

Case Study

HireLabs' launches
assessment center for
Bank Alfalah's university
recruitment strategy

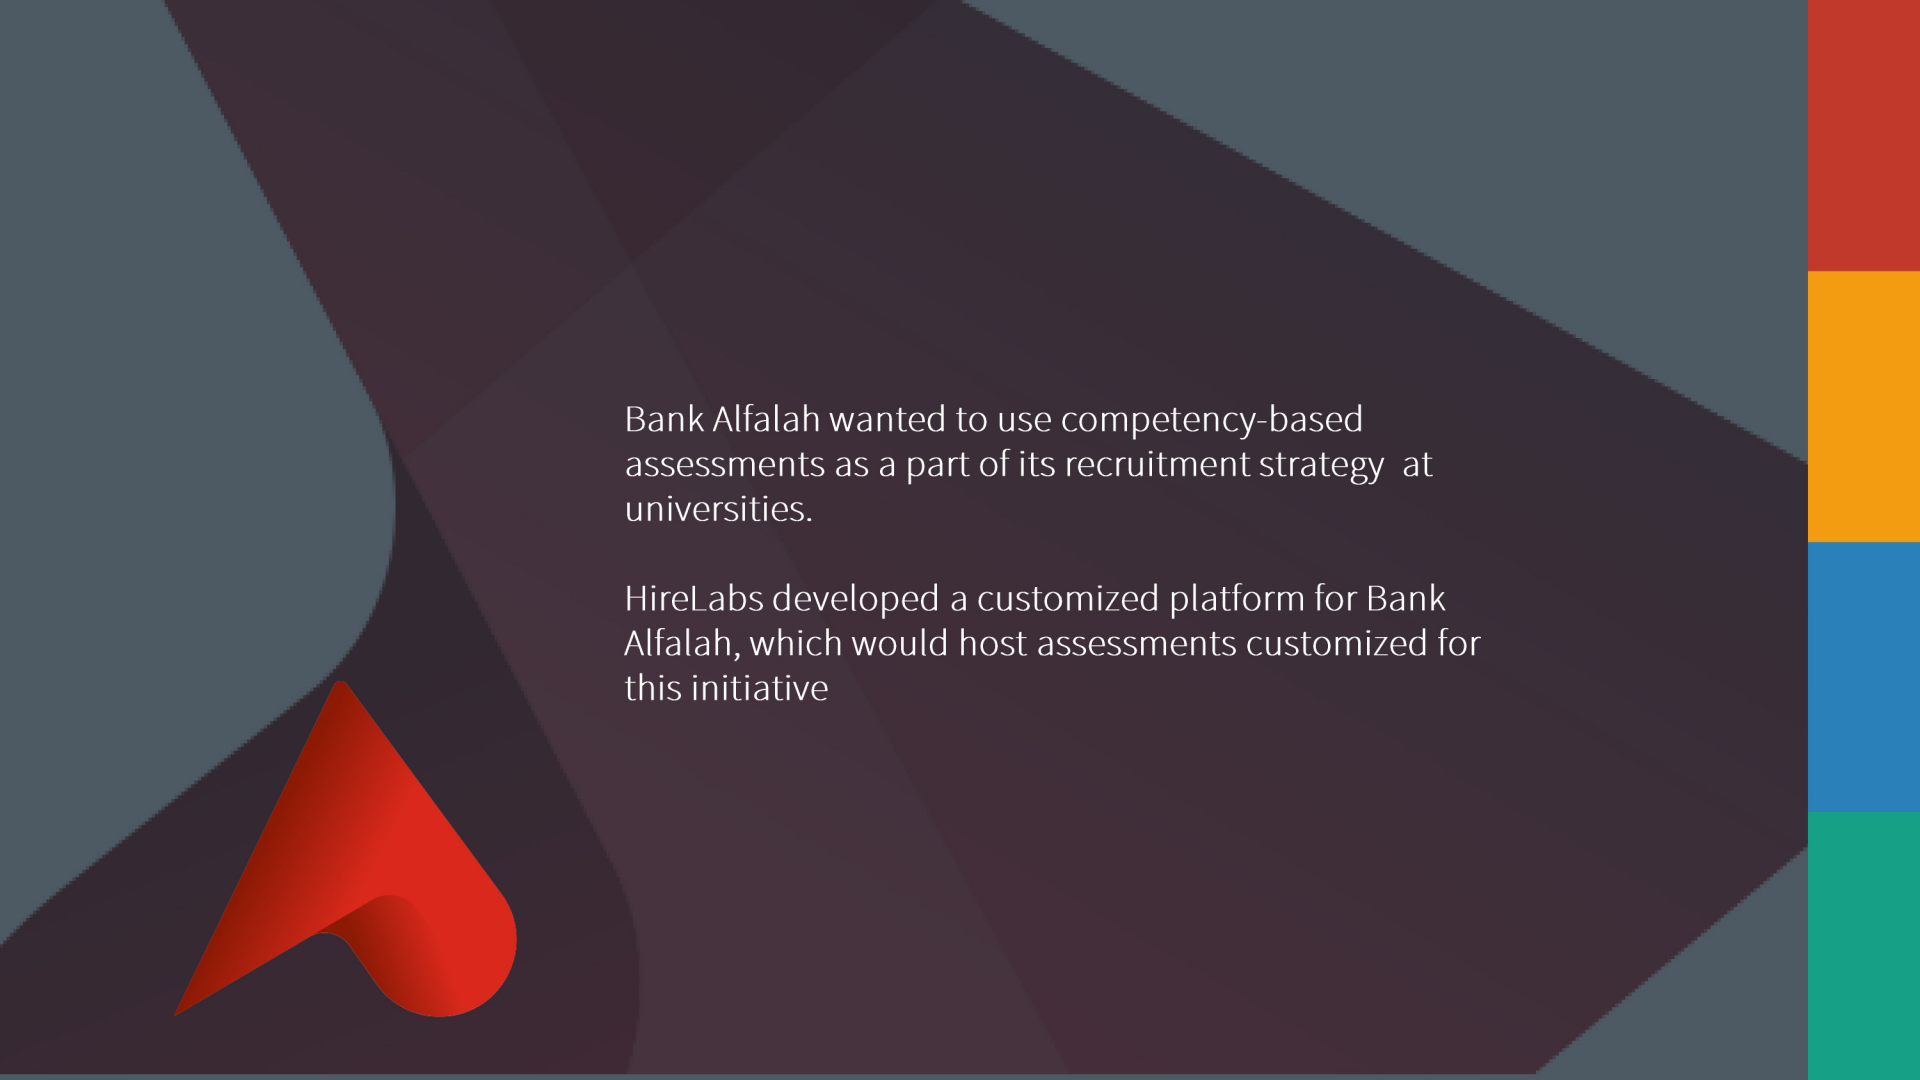

Saleem Qureshi
CEO | HireLabs

The banking sector is rapidly evolving, and the workforce needs to keep in step with the new regulations and compliance.

HireLabs has designed a portfolio of competency-based assessments specifically for the banking sector, which will help leadership teams in optimizing the skills sets present in their workforce.

We would like to congratulate Bank Alfalah on using assessment tools and being at the forefront of workforce development.

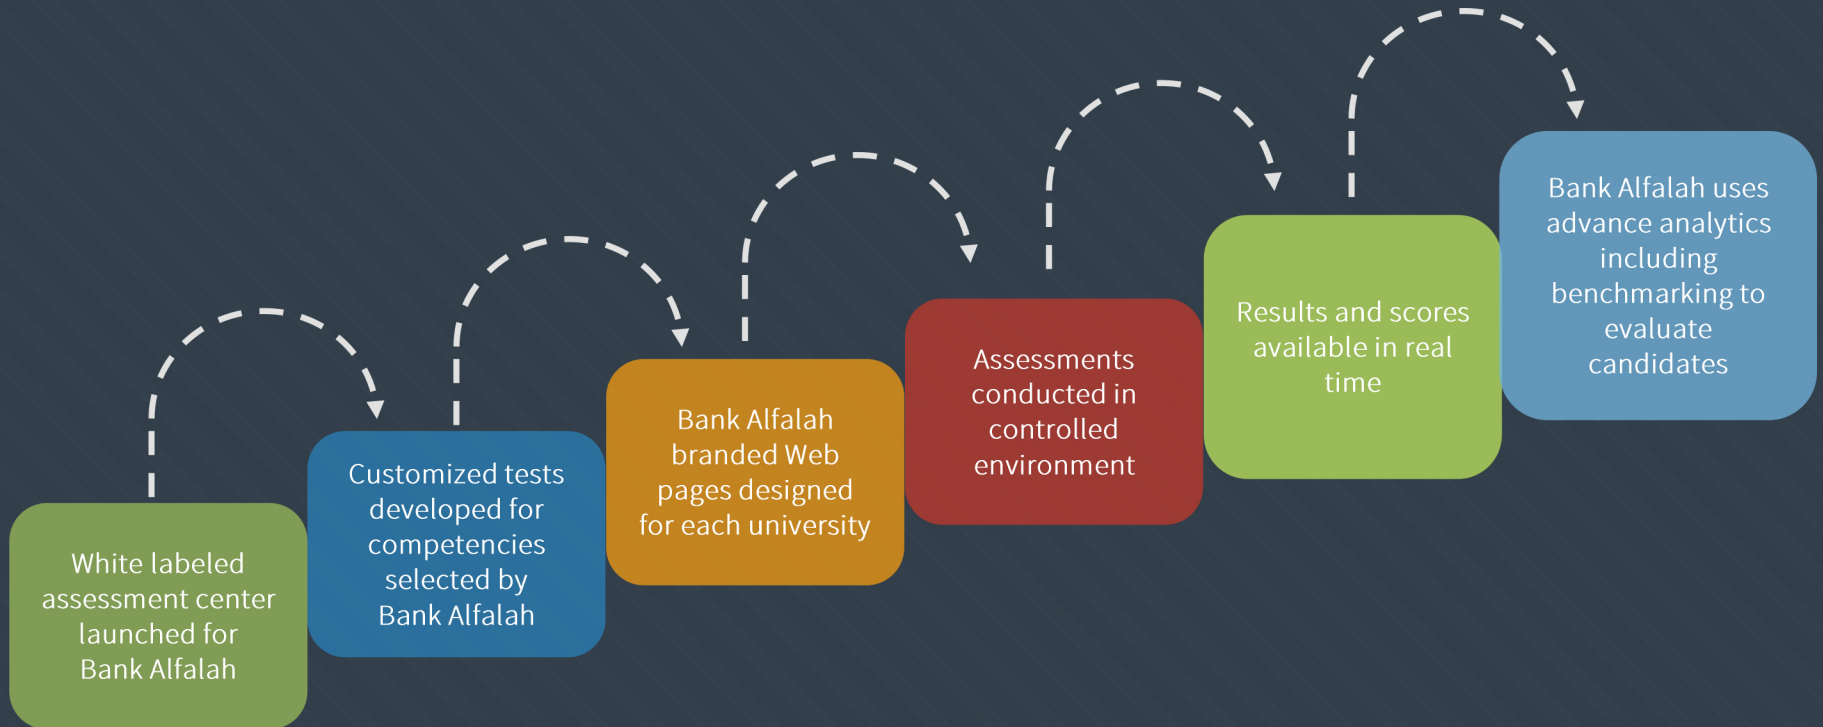

HireLabs

Bank Alfalah wanted to use competency-based assessments as a part of its recruitment strategy at universities.

HireLabs developed a customized platform for Bank Alfalah, which would host assessments customized for this initiative

The Bank Alfalah journey using assessment centers

6 Reasons Why Bank Alfalah Chose HireLabs

6

Reasons Why HireLabs

Conducting a sophisticated recruitment drive in the leading universities of Pakistan on separate Registration Dates.

Shifting from paper based testing to online testing

Filtering eligible candidates systematically through GPA Benchmarking

Employer branding

Automation

Benchmarking

Address cheating

Minimizing the risk of cheating through the shuffling feature in the system, making the recruitment drive more transparent and systematic

Consolidation

Organizing graduate entries in the form of a talent pipeline

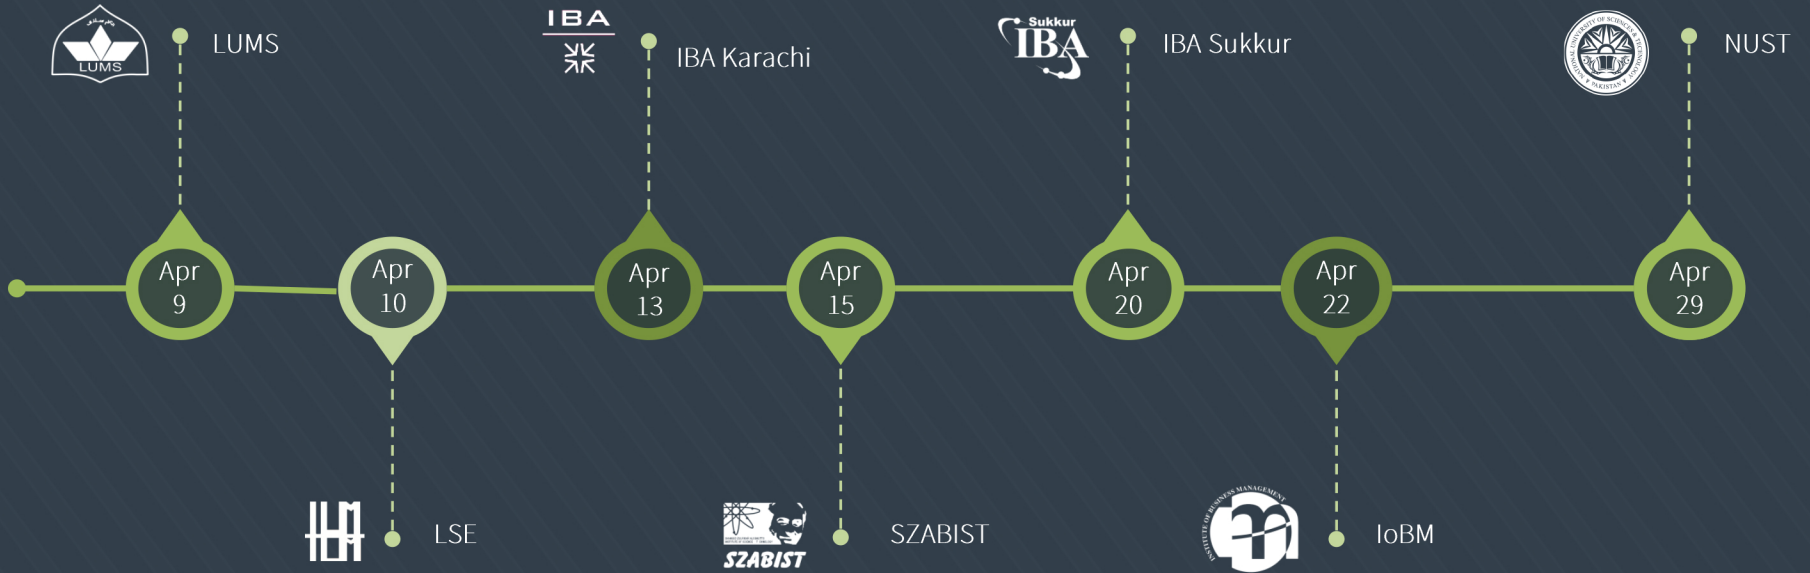

Customization

Collecting short essays with word limits

Attracting talent in the Banking Sector

All onsite assessments conducted in one month

Participating Universities

Bank Alfalah branded web pages developed for each university to allow for bespoke registration

Reasoning

ONE

Assessment

Four

Tests

Business Math

Constructs Measured:

1. Computation of averages
2. Percentages and geometry
3. Calculating rate of change
4. Probability & Word problems

Business English

Constructs Measured:

1. Vocabulary
2. Comprehension
3. Sentence structures
4. Written business communication

Integrated Reasoning

Constructs Measured:

1. Analysis of multiple data sets
2. Testing complex situations
3. Comprehension
4. Multivariate analysis & Data mining skills

Logical Reasoning

Constructs Measured:

1. Discerning logical patterns
2. Sequences
3. Formulating coherent story patterns
4. Solving word & picture

Early Registration

Two reasons

Filter
Candidates
by GPA

A different minimum GPA requirement was established for each university and a filter was added to the registration process to only accept those who met the requirements. Those who qualified were enrolled.

To avoid confusion on the day of the assessment, each candidate that met the GPA requirement was sent a welcome kit which provided guidance on where and when to arrive.

Save time on
the day of
assessment
